**DESIGN FEATURES:** Provides a clean finish at openings, edges of panels or planks and at material transitions.

**JMH** - Specifically designed to work in conjunction with other XtremeTrim® profiles.

**JMS** - True size designed as an independent profile. Use as a closure/cap piece only.

**MATERIAL:** JMH 6063 T-5 .050" (1.27mm) ± .005, JMS .037" (0.94mm) ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion.

**FINISH:** Unless specified all XtremeTrim® items are provided in primed finish. Also available in popular siding/soffit colors in standard face only color match or full coverage CoastalColorCoating™. **JMH** - Clear Anodized is stocked and custom anodized is available (minimums apply).

**FASTENERS AND FASTENING:** Stainless steel fasteners are recommended. XtremeTrim® profiles may be secured in place with a few SS nails until fastened through panels and into studs during panel or plank fastening per siding manufacturer's instructions.

**CUTTING & PAINTING:** Use a non-ferrous carbide miter saw blade when cutting XtremeTrim®. Use Direct To Metal (DTM) paint when jobsite painting. See painting guide.

**XTREMETRIM® BUTT JOINT:** Sealant is required between butt joints where two trims come together. May also be further protected by use of a piece of XtremeFlashing™ behind the butt joint or with a metal flasher behind the joint.

**NOTE:** Do not install XtremeTrim® J mold on Horizontal applications where the exterior flange can catch water.

### RECOMMENDED APPLICATION NOTES:

Please follow siding manufacturer's best practice guides when installing. XtremeTrim® profiles DO NOT form a moisture management system. The architect and builder are responsible for designing and installing a code compliant building envelope. Before installing XtremeTrim® use either a drainable housewrap or a standard housewrap with a rainscreen system if required by code or siding manufacturer.
